Profile

I'm an Information Technology graduate with expertise in data analytics, machine learning, cloud computing, and web developer. In college, I majored in database and web development, and was involved in various projects throughout my studies. During my studies, I actively participated in various internal organizations, enabling me to work effectively both in teams and individually. Based on my experiences in training programs I have participated in, I continuously develop my technical skills, analytical thinking, and problem solving abilities to create useful technology solutions.
